

Our Mission

The Grace Bible Fellowship of Antioch's WEB/Information Technology Ministry seeks to be the center of IT solutions. We will do this by providing system management, system administration, technical support and training for the advancement of the commission found in Matthew 28:19-20.

Our Purpose

The WEB/IT Ministry purpose is to ensure these services are provided in an effective, efficient and timely manner that will allow GBF to evangelize; and to spread the gospel of Jesus Christ, to residents not only in the Antioch Community but throughout the world.

Specifically, the Web/IT Ministry is about proactively building dynamic, interactive, multi-layered activities and services that expand the church's reach to connect with billions of users 24x7.

With the Lord's guidance and direction, we will work to create an instrument so that any person, anytime and anywhere can become a disciple of Jesus Christ and enter into a life-changing, world-transforming journey of faith, hope and love.

What We Do

Web/IT Ministry is the primary way that GBF can reach out to guest, seekers and/or members through a variety of Web and Internet technology tools.

Most people think a Web/IT Ministry is just a website and internet access. However, as delineated below, you will find there are three (3) developing, evolving, and dynamic areas that constitute GBF's Web/IT Ministry.

Note: *Each area has its own vision and action items. See page 2.*

- **Web Ministry**

Web Ministry adapts the tools of the Internet and resources of the world-wide Web to fulfill the church's mission of making disciples, of Jesus Christ, for the transformation of the world. It makes use of the vast communication and information cyber-highway to connect with 2.9 billion people.

- **Social Media**

Since the Web/IT Ministry is more than having a Web presence or website, GBF Web/IT Ministry uses the Internet tools of the 21st Century to enhance and expand the church's ministry. Specifically, these tools/applications are: **FaceBook, Instagram, Twitter and YouTube.**

- **IT Ministry**

The IT Ministry helps supply Information Technology solutions and training for the GBF members, ministries, on-site staff and associated GBF organizations. To do this, we work to form partnerships with all groups and ministries throughout the Church.

WEB/IT Ministry Vision Plans

Website Vision

See Separate doc. ("Grace Bible Fellowship of Antioch Website Policy as of September 3, 2015")

Social Media Vision

1. Deliver a consistent high quality message.
2. Educate others on the use of Social Media.
3. Conduct engaging marketing campaigns.

Additional detail with action items will be developed at a later time. Target November, 2015.

IT Vision

1. **Serve** as the primary technology resource for the Church and associated organizations.
 - Ensure all hardware and software used on the GBF Campus is maintained and fully functional.
 - Ensure good stewardship of the Church's resources by managing cost through strategic planning of technology purchases.
 - Manage technical network contractor resources on behalf of the Church.
 - Ensure the Church has a computer network backup strategy.
 - Support the use of the wireless, virtual & Email server network.
2. **Manage** the GBF Help Desk
 - Provide working technology solutions throughout the GBF Campus.
 - Assist in enhancing the worship experience through technical solutions.
 - Improve the efficiency of GBF staff, ministries and associated GBF organizations, or programs by seeking the best, most cost-effective technical solutions.
 - Participate and actively support all ministries and programs of the Church that require technical solutions.
3. **Provide** Training and Computer Lab support
 - Support basic training on current and new software, applications and hardware.
 - Support technical training provided by other ministries.
 - Provide basic computer training to the youth and help deliver IT training to GBF's members and community.
